Report of the Board of Managers

TO THE PUBLIC WELFARE COMMISSION

Gentlemen:

The report of the Board of Managers of the Dixmont Hospital is herewith presented to you for the biennial period covering the two years ending May 31st, 1926. With this report is submitted the report of the Superintendent accompanied by the various reports of the individual departments of the Institution. From these later reports you will learn in detail all that has been accomplished in the manner of caring for the patients, as well as the many activities and interests that enter into its curative and economic management.

We feel very much has been accomplished for the good of those entrusted to our care. Many of the patients have been restored to health, and have returned home to useful citizenship. Others left our care greatly improved, and those of our number who by reason of their affliction are compelled to remain under our roof the Hospital has afforded a home enabling them to enjoy life in a quiet and comfortable manner. It is gratifying to note the Hospital has been conducted along advanced lines in the care of patients in hospitals of this character, and the two years have been marked by a continuance of the zeal and interest in the work that has been characteristic of our older officers and employees. We feel, therefore, we have attained a very reasonable measure of success, though the Hospital has been crowded far beyond its normal capacity during the period covered by this report. That the Hospital should be so crowded may be expected when we consider the thickly populated districts which comprise the area from which patients are drawn by this Hospital.

As in previous years every effort has been made by the Managers to broaden and enlarge the usefulness of the Hospital, and those who are familiar with its management, who know something of the details connected with its every day life, and who are familiar with the many questions of responsibility and the problems that ever arise in its conduct realize more than any one else the good the Institution is doing for that portion of Pennsylvania which it serves.

During the period the health of our patients, as well as of the entire household has been good, and we feel the watchful care and oversight of those in their immediate charge has contributed largely to this condition, and our patients have been given every possible freedom that discipline and present day methods of caring for these dependent people demand.

We are pleased to record the very great interest taken by our Board of Managers in the welfare of the Hospital. Our meetings have been regularly attended, and the various departments of the Institution have been visited. All questions relating to the policy and administration of the Institution have been given full consideration with the sole purpose of promoting its best interests, its usefulness, and the maintaining its high plane of efficient service. In addition to the meetings of the Board of Managers the Hospital is visited regularly by the members of the Executive Committee who inspect all departments and familiarize themselves with the various conditions and interests of the Institution.

Their immediate supervision of the finances of the Hospital insure an economic expenditure in its maintenance and the oversight of all monies expended in the various repairs and improvements.

The members at all times have sought to aid by their advice and counsel the officers, and whenever possible to share responsibility and lighten the load in caring for this great charity.

The reports of the Treasurer present in concise manner the finances for the period covered by this report.

The physical condition of the Institution has been maintained in the making of all needed repairs to buildings, and care of farm lands, and the wards and dining rooms continue to be attractive and homelike.

It is our sad duty to record at this time the deaths of two members of the Executive Committee: Alexander L. McKibben, who became a member of the Board in 1904, and was appointed upon the Executive Committee in 1905, died August 23rd, 1925, and Lawrence C. Woods, who was appointed in 1914 and who died November 10th, 1925.

Respectfully submitted,

DAVID A. REED,

Pittsburgh, Pa., May 31st, 1926.

President.

REPORT OF PHYSICIAN
AND SUPERINTENDENT

Report of the Physician and Superintendent

TO THE PRESIDENT AND BOARD OF MANAGERS

GENTLEMEN:

I have the honor to submit for your consideration this report of the Hospital for the two years ending May 31, 1926.

The statistical tables which are presented will give you very much information in regard to the movement of the population of the Hospital included in this report. Accompanying this report, also, are the reports of the several heads of the departments of the Institution which show not only the expenditures of the Hospital, but what has really been accomplished in the way of caring for the patients, also, the expenditures necessary in keeping the Institution, its buildings and grounds in order.

From the above statistics you will note there were six hundred and fifty-five patients admitted during the two years. Of this number four hundred and seventy-eight were supposed to have been first admissions. One hundred and sixteen patients had before been residents of this or other institutions, and sixty-one patients were transferred to this Hospital from other Institutions.

The total number of sixteen hundred and twenty patients were under treatment during the biennial period. It will be noted, also, that seventy-six patients were dismissed from the Hospital as having been restored. One hundred and seventy-three left our care as very much improved in their mental and physical health, many of these patients afterwards made good recoveries at home. Twenty-two patients were discharged for various reasons as unimproved. Seventy-one patients were transferred from this Hospital to other Institutions in the State.

Two hundred and fifty-seven patients died.

At the close of the biennial period there were one thousand and fifteen patients remaining in the Hospital. The average number of patients for the period was nine-

hundred and ninety-four. The highest number in the Institution at any one time was ten hundred and thirty-eight, and the lowest number upon any one day was nine-hundred and fifty. From these latter figures it will be noticed the constantly increasing over-crowding of the Hospital. It is gratifying, however, to note the general health of the entire household during the two years was excellent, and the patients while crowded were most comfortable, and the high standard of health was due largely to the number of patients employed daily in some useful, as well as agreeable outdoor occupation, in this manner not only contributing to their health, happiness and contentment, but in a large measure as an economic factor. Those of our number unable to engage in any activity were urged to spend as much of their time as possible out of doors.

Of those admitted the Dementia Praecox group again predominates. In the total number of admissions there being eighty-eight patients or twenty-eight percent.

One hundred and twenty-one patients were classified as belonging to the Manic-depressive group or eighteen percent.

Fifty-nine Paretics were admitted or nine percent, many of these patients were very young.

Thirty-eight cases of Paranoia or five percent.

Thirty five patients belonged to the Involutional-melancholia group or five percent. Twenty-seven patients were Epileptics or four percent. Forty-three were classified as drug addictions and other toxic forms of mental disease, or six percent. A number of these cases after a short residence made good recoveries.

Eighteen admissions were classified under the group of Mental deficiency. Eighty-three patients presented different degrees of senility.

Of the Dementia Praecox cases, twenty-five were discharged as recovered, and sixty-nine patients were discharged as much improved. Of the Manic-depressive group

sixteen patients were discharged recovered, and twenty-nine as improved.

Four patients with paranoid conditions were discharged as restored, twelve left the Hospital as improved only.

The character of the patients brought to us differ but little, and present the same difficulties as in former years, there being many admissions for whom we can obtain but little history, the friends refusing to give any information. Other patients were brought whose mental condition had existed so long and who were so broken down in health they had but little hope of recovery.

Of the causes of death tubercular disease in its many manifestations again predominated. There being forty-four deaths attributable to this disease.

Twenty-two deaths resulted from pneumonia. Twenty-nine deaths were the result of some form of heart disease.

Five patients had been residents of the Hospital for more than fifteen years at the time of death, and twenty-one patients had been residents of the Institution for more than twenty years.

At the time of death thirty-three patients were over forty years of age.

Forty-two patients were aged fifty years or over, Forty-one patients were over sixty years of age. While forty-six deaths occurred in patients over seventy years.

It may be of interest to note forty-two patients died of the Dementia praecox psychoses group.

Thirty-two deaths occurred in the Manic-depressive psychoses group. Fourteen patients who died belonged to the paranoid psychoses. Twenty-one patients died were Epileptics.

Eleven patients died who were classed as belonging to the Involution-melancholia psychoses.

Fifty-three patients, thirty-four men and nineteen women, died from Paresis. A very notable increase in the number of deaths from this disease, particularly noteworthy in the women patients.

Upon three occasions owing to the circumstances under which death occurred it was thought advisable to

call the Coroner, who visited the Hospital, and upon hearing the statements in each case exonerated the Institution and officers from fault or censure.

Death from any unnatural cause in an Institution is at all times dreaded, yet not unlooked for, and even to be expected, no matter how vigilant those in charge.

It again became necessary for the Board to refuse the admission of patients for a time or until the overcrowded conditions of the wards and departments could be relieved.

Exceptions to this order were made only in most urgent cases, those needing immediate Hospital care.

To relieve this condition early in the biennium twenty patients were transferred to the State Hospital at Torrance, and twenty patients were sent to the State Hospital at Wernerville. Later on thirty women patients were sent to the Torrance State Hospital.

As in former years many patients were granted paroles in the hope that a few weeks at home and away from the tedium and association of Hospital life would benefit them and perhaps hasten their recovery, and by this means, also, aid in reducing our over-crowding. In each instance the greatest care was exercised in the selection of those whom it was thought with safety could return to their homes and community.

A number of these patients improved, a few recovered, the greater number were returned to the Hospital their conditions of health much worse than at time of leaving its care.

Realizing the Hospital is the home of so large a proportion of our population constant effort was made by the officers in providing amusement and recreation as well as in making the wards comfortable and homelike. Music, concerts, dances and motion pictures occupied their attention many evenings during the winter season. Those fond of reading enjoyed an abundant supply of daily papers, current literature and magazines.

The greenhouse was called upon to provide cut flowers and plants for the dining rooms. The classes for women in calisthenics, drills, dancing and music were continued twice every week. A number of patients with their atten-

dant were permitted to visit the city for shopping and enjoying the theatres. Following the usual custom a number of parties were given during the winter for the employes, when refreshments were served and the hall appropriately decorated.

Church services were held in the chapel Sunday afternoons. The service being in charge of neighboring ministers. These observances are looked forward to by the older members of the household, the music is provided by patients and employes, and the chapel is usually filled with an attentive audience. We are indebted to those good men for their readiness at all times to answer our calls to visit the sick and bring a message of comfort and consolation. The Sunday school class for women patients held in the chapel Sunday mornings was continued with unabated interest.

The report of the farm shows this department has been managed in an efficient, economical and satisfactory manner, and with profit to the Hospital in all its branches. In addition it has afforded many of our patients an opportunity to engage in some useful and attractive occupation bringing them contentment and a return of health. The farm is becoming more productive each year, with better crops and a better yield of fruit. The well kept farm lands, orchards, vineyards, roadways, and out-buildings were a delight to those interested in farm work.

The housekeeper's report shows the immense amount of vegetables and fruit put up for winter use, but gives no intimation of the labor and time required in the preparation of these farm products.

The mechanical and operative department has been conducted the same as in other years. All needed repairs to equipment and machinery has been made, and all waste eliminated in so far as possible. The same difficulty was experienced in our inability to employ efficient help, causing frequent changes in the employes and the engineer much anxiety and long hours of labor.

The ordinary repairs and renewals to the buildings have been maintained, also, the usual amount of house cleaning and painting. The industrial and occupational departments received the usual care and attention by the officers and those having the immediate charge of these

agencies. Many patients unable to engage or take part in other activities with the guidance of their instructors became interested in employment within doors, showing an aptitude and originality in the making of the beautiful products of the Art room as well as in the more practical results obtained in the Industrial building. These departments are of the greatest therapeutic value in certain types of patients, their work from the beginning showing a progressive improvement as their mental condition becomes more stable, followed in many cases by recovery.

The business and administrative work of the Institution was maintained the same as in other years, and the usual care and economy exercised in the purchase and supervision of all supplies, furnishings and equipment.

The medical work was in the main satisfactory. Though at times extremely difficult to maintain an efficient standard owing to the frequent changes in the staff membership. It is becoming almost impossible to secure men with suitable training or liking for this particular branch of medicine and institutional work. Many young physicians accepting positions possess but little practical knowledge of mental disease and only after months of patient training, study and association with the mentally ill become of real value to the patients and the Hospital. It is most discouraging, they leave at this time to accept positions presenting wider opportunities for the fulfillment of their ambitions and desires in their profession.

Upon several occasions the advice and counsel of members of the consulting staff was sought in perplexing cases of illness, as well as for surgical aid. In each instance these requests were met with a willingness to help in every manner possible.

For many years the Hospital has been particularly fortunate in having upon its consulting staff Dr. S. Victor King as surgeon, whose recognized ability brought to the Hospital a distinguished service and security fully realized by patient and employe. His readiness and willingness in visiting the Hospital at all hours, his advice and skill in affording relief to those needing his care endeared him to the entire household, and it was with sincere regret his resignation was accepted.

The position thus made vacant was filled by the appointment of Dr. C. A. Bicking, whose wide experience and training fully justify his selection.

The appreciation of the value of the mental clinic referred to in the last report of the Hospital warranted the establishing of other clinics in the nearby larger cities of this Hospital district, and, also, examination of inmates in the corrective institutions of Western Pennsylvania. While requiring very considerable time in attendance upon these several duties the work was entrusted to Dr. Thomas M. Barrett, Senior assistant of the Hospital.

The following changes occurred in the personnel of the staff:—

Dr. Bela C. Balas appointed June 10, 1924, resigned April 1, 1925.

Dr. Jacob Philip Nill appointed June 23, 1924, resigned June 30, 1925.

Dr. Thomas M. Barrett reappointed June 30, 1925.

Dr. Joseph Altwer appointed July 1, 1924, resigned October 15, 1924.

Dr. Lloyd D. Cutting appointed October 15, 1924, resigned July 10, 1925.

Dr. Lloyd G. Reese appointed April 27, 1925.

Dr. William Joseph Scruggs appointed June 6, 1925, resigned December 29, 1925.

Dr. Hubert A. Boyle appointed February 21, 1926.

The graduating exercises of the Training School for Nurses were held in the Hospital chapel Thursday evening May 15, 1924. The address to the class was made by Dr. John G. Bowman, Chancellor of the University of Pittsburgh. The diplomas were presented to thirteen young women graduates by Mr. William E. Frick, Vice-President of the Board of Managers.

On Thursday evening, May 21, the graduating exercises of the class of 1925, five in number, were held in the chapel. The address of the evening was made by Rev.

Dr. Edwin J. Van Etten and the presentation of the diplomas and prizes by Mr. William E. Frick, Vice-President of the Board of Managers.

It is most gratifying to report the continued interest so manifest in the promotion and influence for good of the Training school as shown by our valued Directress of Nurses and her associates. The school has attained a high plane of usefulness not only in the care of our household, but in the recognition of the efficient service rendered by its graduates in caring for the sick and afflicted in the outside world as well as in the many responsible positions they now occupy.

To the many friends who have so generously remembered our household in their contributions for the comfort and pleasure of our people as well as the expressions of gratitude and interest shown in the welfare of the Institution it is my pleasure to acknowledge at this time.

In closing this report it is again my privilege to acknowledge the steadfastness and loyalty of the older officers and employes who have done so much to promote the highest aims of the Hospital in its long years of usefulness for those intrusted to its care. And may I be permitted also, once more to renew my feelings of gratitude to the members of the Board and particularly the gentlemen of the Executive Committee for their counsel and co-operation so freely granted at all times in sharing the responsibilities in the conduct of this Institution.

Respectfully submitted

Miss Vinnie M. Chappell, Pa.	Miss Jessie McCammon, Ireland
Miss Florence H. Coburn, W. Va.	Miss Bertha B. McNickles, W. Va.
Miss Anna M. Gregg, Pa.	*Miss Elizabeth L. Orr, Scotland
Miss Virginia M. Krom, Pa.	*Miss Alma E. Reeves, Pa.
Miss Edna A. McBride, W. Va.	Miss Katherine M. Smith, S. C.
Miss Eva M. Murray, W. Va.	Miss Anna I. Veitch, Pa.

1918

Miss Florence L. Davis, W. Va.	Miss Virginia S. Bruce, W. Va.
Miss Virginia S. Ledwidge, Pa.	Miss Myra R. McBride, W. Va.
*Mrs. Elizabeth Springer, Scotland	

1919

Miss Dorothy E. Baker, Pa.	Miss Edna Olive Smith, W. Va.
Miss Mary A. Kostura, Pa.	Miss Roxie R. Williams, W. Va.
Miss Jane R. Marshall, Pa.	

1920

Miss Bessie Downing, Pa.	Miss Helen K. Beachy, Md.
Miss Mary J. Downing, Pa.	Miss Evelyn E. Beachy, Md.
*Miss Helen F. Graham, Pa.	Miss Amanda F. Wild, Ohio

1921

Miss Edna Katherine Durst, Md.	Miss Elizabeth M. Nicholson, Pa.
Miss Ethel Elizabeth Gibb, Pa.	Miss Gertrude L. Davis, W. Va.
Miss Ruth Elizabeth Pickering, Pa.	Miss Matreda Belle Beckman, Pa.
Miss Bessie Belle Pickering, Pa.	Miss Mabel Amelia Bock, Ohio
Miss Mabel Beatrice Davis, W. Va.	Miss Ella Luzurah Hite, W. Va.
Miss Elizabeth Ann Smith, W. Va.	

1922

Miss Helen Louise Kopera, Ohio	Miss Katherine Florence MacLeod
Miss Sara Mae Kyle, Pa.	Prince Edward Island
Miss Beatrice Ricketts, Pa.	Miss Margaret Hannah MacLeod,
Miss Anna Marie Strang, Pa.	Prince Edward Island
Miss Hulda Mae Thomas, Pa.	Miss Dora Lee Heckert, W. Va.
	Miss Metta Jane Heckert, W. Va.

1923

Miss Sara Virginia Coates, Irel'd	Miss Alma Blanche Tressler, Pa.
Miss Annie L. Heckert, W. Va.	Miss Bessie S. McCammon, Irel'd
Miss Lillie Olive Jones, W. Va.	

1924

Miss Katheryn Grace Barideau, Pa	Miss Mary Laurene McGookey, O.
Miss Louise May Coshen, Pa.	Miss Mary Luciel McGookey, Ohio
Miss Lumen Jean Dantheny, Pa.	Miss Lolita Louisa Swefert, Ohio
Miss Laura Cordelia Hand, Pa.	Miss Frances Margaret Smith, Pa
Miss Valeta Cleo Hallahan, N. Y.	Miss Barbara C. White, Pa.
Miss Helen Allenea Kerr, Pa.	Miss Lillian Mae Wright, Pa.
Miss Goldie Eva Lockard, Pa.	

1925

Miss Ruth Clarkson, Pa.	Miss Ruth Eva Patton, Pa.
Miss Minnie H. M. Lewis, Pa.	Miss Alice May Wilson, Pa.
Miss Susan Lobin, Pa.	

1926

Miss Esther McConnel, Pa.	Mrs. Mayme Whaley, W. Va.
Miss Elizabeth Metro, Pa.	Miss Artie Williams, W. Va.
Mrs. Angelo Stull, Pa.	

*Deceased

REPORT OF CLINICAL LABORATORY FOR TWO YEARS

Ending May 31, 1926.

Bacteriological Smears	1700
Blood Cultures	35
Blood Cystology	80
Blood Grouping	74
Blood Nitrogen	31
Blood Sugar	30
Blood Widal	23
Blood Icterus Index	5
Colloidal Gold Test	76
Mastic Gum Test	76
Globulin Test	38
Spinal Fluid Sugar	8
Sputum	89
Test Meals	4
Throat Cultures	68
Vaccines	1000
Urines	1300
Vaginal Smears	48
Wasserman Tests, Blood	750
Wasserman Tests, Spinal Fluid	76

The number of Wasserman Blood Tests for the past 2 years was 750, of this number 435 were male patients, among which 22 or approximately 5% were found positive, while of the 315 female patients, only 8, or approximately 2½% were positive. Of the total number of both sexes there were 30 positive reactions.

REPORT OF DENTIST FOR TWO YEARS

Ending May 31, 1926

	Men	Women	Total
Amalgam Fillings -----	40	25	65
Crowns -----	1	1	2
Cement Fillings -----	25	20	45
Gold Inlay Fillings -----	2	3	5
Porcelain Fillings -----	10	18	28
Extractions -----	375	250	625
Plates Made -----	10	8	18
Plates Repaired -----	6	4	10
Propholactic Treatments -----	101	25	126
Treatments -----	47	20	67

STATISTICAL TABLES

JUNE 1, 1924 to MAY 31, 1926

AND 1856

STATISTICAL TABLES

TABLE 1

Movement of Patient Population for Two Years Beginning
June 1, 1924 and Ending May 31, 1926

	Male	Female	Total
Number of Patients on books of institution at beginning of Institution Year -----	494	471	965
Admissions during two years:			
First admission -----	271	207	478
Readmissions -----	58	58	116
Transfers from other institutions for the insane -----	25	36	61
Total received during two years -----	354	301	655
Total under treatment during two years--	848	772	1620
Discharged from books during two years:			
As recovered -----	49	27	76
As improved -----	75	98	173
As unimproved -----	6	16	22
Transferred to other institutions for the insane -----	44	33	77
Died during two years -----	144	113	257
Total Discharged, transferred and died dur- ing two years -----	318	287	605
Remaining on books of institution May 31, 1926 -----	530	485	1015
Average number during period -----	501	443	994
Highest number during period -----	524	514	1038
Lowest number during period -----	478	472	950
?			

TABLE II

Total Admissions and Discharges since 1856

Admissions and Discharges	Male	Female	Total
Admitted -----	8,811	6,476	15,287
Discharged—Restored -----	2,001	1,557	3,558
Discharged—Improved -----	2,630	1,884	4,514
Discharged—Unimproved ----	862	525	1,387
Died -----	2,744	1,992	4,736

RULES FOR THE ADMISSION OF PATIENTS

1. Each patient, before admission, shall be made perfectly clean and be free from any contagious or infectious disease.

2. Each male patient shall be provided with at least three new shirts, a new substantial coat, vest, and pantaloons, three pairs socks, two suits underwear, hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

3. Each female patient shall have three calico dresses, four chemises, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pair shoes, one shawl or cloak, and one hat or hood.

4. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved or when they attend religious worship, walk or ride out, their self respect may be preserved.

In all cases the patients best clothing should be sent; it will be caefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, matches, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of the patient's removal, or within three months afterwards, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned. All women patients must be accompanied to the Hospital by some female friend as required by law.

6. The price of board, including washing, mending, and attendance for all who are supported at public charge, \$6.00 per week. For private patients, or those supported by themselves or their friends the price varies from fifteen dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

7. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

8. All bills remaining unpaid one month after date of presentation are placed in the hands of the Solicitor of the Hospital for collection.

9. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cake, or other edibles shall be given to the patients by their friends or visitors, without his express permission.

10. Visitors are admitted to inspect the Institution on Wednesdays and Saturdays between the hours of 10 A. M. and 12 A. M. and between 2 P. M. and 4 P. M.; but no visitor shall be admitted to the wards occupied by the patients, without express permission from the Superintendent; and especial care is taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays or on Sundays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

11. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railroad, at Dixmont, and can easily be reached by cars, there being many trains (east and west) each day (except Sunday), stopping at the Hospital Station. The street cars also run within a short distance of the Institution.

12. Applications for the admission of patients, and all communications in regard to the condition, health, bills, etc., of those who are in the Hospital, shall be made to the Superintendent.

13. The Superintendent can be seen at the Hospital, every week day, Sundays by appointment.

14. As Dixmont Station has an Express Office, all goods may be sent to the Hospital direct by express, freight, or parcel post, as may be preferred.

15. The friends of patients can communicate with the Institution by telegraph and telephone.

REPORT OF THE BOARD OF MANAGERS TO THE STATE DEPARTMENT OF WELFARE

The Managers of the Dixmont Hospital respectfully present this report showing the operations of the Hospital for the Biennial period ending May 31st, 1928. This report is accompanied by the report of the Treasurer presenting to you in concise form the financial condition of the Hospital as well as the report of the Superintendent, and the heads of the several departments, together with the statistical tables showing the movement of population, admissions, discharges, deaths, and all other information regarding the present conditions of the Hospital and of its varied activities.

The biennium has been a busy one and the reports referred to will give you a fairly good idea of all that has been accomplished for the good of those committed to the care of the Institution, in the restoration of so many patients to health and return to their homes to assume again their accustomed responsibilities.

It is gratifying to record the uniformly good health that has prevailed, particularly regarding patients, although our wards have been crowded far beyond their normal capacity.

Early in the fall of 1926 there were a number of cases of Typhoid Fever occurring among the employees, the disease being confined to nurses and attendants. The trouble was at once reported to the State Department of Health, whose representatives visited the Hospital, and their valued suggestions and assistance aided very materially in arresting the further progress of the disease. There were two deaths, but with this exception the period has been an uneventful one as regards the health of the entire household.

We believe we have great cause to feel the period covered by this report has been a successful one in our endeavor to place the Hospital upon a high plane of usefulness, as well as its advancement and broadening influence in the community which it serves. In this we have been aided in large measure by the cordial co-operation

and good fellowship existing in all departments of the institution.

The enthusiasm so noticeable upon the part of the officers and older employees in their efforts to promote the well-being of the patients has again dominated the conduct of the Institution, and the patients have enjoyed every freedom conducive to their happiness and comfort within the rules of discipline, and their medical care has been in conformity with the standards now required in all modern well appointed Institutions for the mentally ill.

The doors of the Hospital have been open to receive those needing its care and protection. No patient was refused, and, as already stated although the wards were crowded beyond the bounds of safety, both as regards health, comfort, and the added possibilities or danger, it was believed all patients would be afforded more comfort and better care with a hope of recovery, than had they been denied admission, and compelled to remain under conditions less favorable for their return to health.

In presenting this report we feel the Institution has been conducted economically, its business affairs well managed, waste and all appearance of extravagance overcome in so far as possible, and while the entire household has been well provided for, a strict oversight in the purchasing department has been maintained.

The Farm has contributed its full share in providing bountiful supplies of vegetables and fruit, and the more staple articles in the way of provender for the feeding of its stock.

It is a pleasure to note again the comfort and home-like conditions and cleanliness of the Institution.

At the last session of the Legislation the Hospital received an appropriation, approved by the Governor May 11th, 1927, of the sum of \$48,000.00 for the building of a water filtration plant and \$4,000.00 for the purpose of renewing piping, fixtures, etc., in the Hospital buildings, the total sum of \$52,000.00 to be available for these purposes for the coming two years beginning June 1st, 1927. The necessity for these improvements to our main

water supply has been apparent for a long time. We are glad to report this much needed improvement has now been completed and insures to the Hospital a supply of clean, pure water for all purposes. The plant has been constructed along modern and approved ideas, and is one of the notable improvements made at the Hospital in a long while, the cost of construction also being within the limits of our appropriation. The plant was accepted by the Executive Committee November 22nd, 1927.

The rebuilding of the Beaver road along the entire front of the Hospital property may be included in this report as a noteworthy improvement. Through the generosity of the Managers this was made possible in the granting of sufficient land for the purpose of changing the location of the road, in this manner overcoming two dangerous railroad crossings. This new road presents a beautiful appearance, is twenty-seven feet in width and should meet all requirements of the State Highway Department and the traveling public for years to come. It was formally opened to the public September 7th, 1927.

One of the greatest problems encountered in the management of the Institution has been the inability to secure suitable young men for the positions upon the medical staff. At times it has seemed almost unsurmountable, and while this Hospital is not alone in this individual difficulty it does not lessen the worry that comes with the feeling of having young men who are not suitable, either by education, training or temperament for the positions they occupy.

This report would be incomplete without referring again to the very able and efficient supervision given the Hospital by the Executive Committee. The meetings throughout the year have been well attended and every consideration given all questions in regard to the policy, management and the care of the immediate household. The Committee has been most solicitous in its effort to afford every possible comfort for the relief and betterment of our patients, for their entertainment and amusement and in its willingness to share the responsibilities of the resident officers in the many perplexities and prob-

lems bound to arise in the conduct of an Institution of this character.

In the period covered by this report the Hospital has lost four of the oldest members of the Board: Mr. James H. Park who became a life member in 1899 and whose death occurred February 13th, 1927. Hamilton Stewart, made a Director in 1909, died November 2nd, 1926.

Henry Buhl, Jr. who died June 11th, 1927 and James H. Reed a life member whose death occurred June 17th, 1927.

In concluding this report we would express our appreciation of the earnestness and devotion of the members of the staff in their endeavor to promote the best interests of the patients and afford the Hospital the highest type of medical service and to the heads of the several departments and to all other employees we would also at this time offer our sincerest gratitude for their loyalty and devotion to our dependent household.

Respectfully submitted,

DAVID A. REED,

President.

Pittsburgh, Pa.

REPORT OF PHYSICIAN
AND SUPERINTENDENT

Report of the Physician and Superintendent

TO THE PRESIDENT AND BOARD OF
MANAGERS

GENTLEMEN:

I have the honor to submit for your consideration this report of the Hospital for the two year period ending May 31st, 1928.

Briefly stated the statistics of the patients' population shows:

	Men	Women	Total
Patients on Books of the Hospital			
June 1st, 1926	530	485	1015
Admissions during two years:			
First Admissions	247	178	425
Readmissions	55	71	126
Transfers from other Institutions			
for the Insane	30	35	65
	<hr/>	<hr/>	<hr/>
Total received during two years	332	284	616
Total under treatment during two			
years	862	769	1631
Discharged from books during two			
years			
As recovered	19	24	43
As improved	127	102	229
As unimproved	19	16	35
Transferred to other institu-			
tions for the insane.....	1	3	4
Died during two years.....	136	100	236
	<hr/>	<hr/>	<hr/>
Total discharged, transferred and			
died during two years	302	245	547
Remaining on books of Institution,			
May 31st, 1928	560	524	1084
Average number during period.....	543	505	1048
Highest number during period	562	527	1089
Lowest number during period	524	483	1007

From the above statistical tables it will be seen at once the continued crowded conditions of our wards. The

highest number of patients in the house during the period was one thousand eighty-nine, the lowest number was one thousand seven, and the average number during the period one thousand forty-eight. But forty-three patients were discharged as recovered, being the lowest recovery rate for many years, while two hundred twenty-nine patients were discharged as improved, of which a number made good recoveries at home. Thirty-five patients were discharged from the Hospital as unimproved, four patients were transferred to other institutions for the insane. Two hundred thirty-six patients died, making a total of five hundred forty-seven patients discharged, transferred and died during the two years.

At the close of the two year period, therefore there remained five hundred sixty men, five hundred twenty-four women, one thousand eighty-four total.

That more patients were not discharged as recovered and more as improved may be explained in large measure as the opinion of the staff of the conditions of mental health of patients at time of leaving the hospital. In so far as possible no patient is discharged unless regarded as reasonably safe to be at large.

It must be remembered the question of discharging a patient or granting a parole is an important one and cannot be done without serious thought and consideration to avoid the possible danger of accident, trouble, and even loss of life in the community to which the patient may return. Also the same conditions seemed to prevail as reported to you in former occasions, our inability to secure consent of friends to care for them at home.

Of the patients discharged quite a number were returned, they being unable to adjust themselves to their former surroundings, and in others the progressive character of their mental illness compelling friends to again place them under hospital care. Owing to applications received from residents of adjoining states for admission of patients, by order of your Executive Committee these requests were refused as being unjust to admit these patients when the Institution was so crowded with patients coming from our own immediate hospital district.

Of the total number of 616 patients admitted 213 patients represented the several types of Dementia Praecox or 36%. 109 patients were of the Manic Depressives or 18%. 52 patients were general Paretics or 8%. 25 patients were Paranoiacs or 4%. 25 patients were Epileptics or 4%. 39 patients were Toxic forms of mental disease, or 7%. 24 patients were cases of Involution Melancholia or 4%. 52 admissions or 9% represented other forms of psychoses, while 60 patients or 10% represented various degrees of Senility.

It is interesting to note a large percentage of the Dementia Praecox admissions were very young men, in several instances giving a history of alcoholism and drug addiction and later on of some form of crime or criminal tendencies. A number could be properly classed as hold-up-men, while others had been accused of various petty crimes. Many of these young men also were of low mentality, irresponsible, and with a history of some form of defective parentage. Of those who recovered or were greatly improved at time of returning to their homes quite a number gave promise of becoming useful citizens. A group of admissions were younger patients brought to us without psychoses, and some of them mild cases of mental deficiency, these patients should have been committed to an Institution for feeble-minded where they could associate with children of their own age and be taught a trade. Fortunately we succeeded in interesting friends of a number of these patients to take them home.

Of the patients discharged as recovered 15 patients were cases of Dementia Praecox or 3%, 8 were Manic-Depressives or 2%. 7 were cases of Involution Melancholia or 1%, 8 patients represented other forms of psychoses or 2%.

Of those discharged as improved 112 were Dementia Praecox or 35%, 63 patients belonged to the Manic-Depressive group or 23%, 42 cases represented the various form or Toxic Psychosis or 13%, 15 were cases of Involution Melancholia or 5%, 14 were Paretics or 4%, 21 were Paranoiacs or 7%, 10 were Epileptics or 3%, 7 were cases of mental deficiency or 2%, 7 were cases of

Senility or 2%, 16 represented other forms of mental disease. The Paretics discharged had been given malarial treatment and were in various stages of remission. A small percentage have been returned to the Hospital, others have been able to remain at home and resume their several occupations in life as their apparently restored health continues.

The principal psychoses represented in the total number of deaths, 45 patients died as the result of exhaustion from Paresis of whom eight were women. 46 patients were cases of Dementia Praecox, 43 patients were those of Senility, 12 patients were cases of Epilepsy. 9 patients were Paranoiacs.

The causes of death do not differ materially from those of former years, 38 patients died from some form of heart disease, 37 patients died from pneumonia, 36 patients died from tuberculosis, 11 patients died from Bright's disease. Eleven patients at time of death had been residents of the Hospital for more than 20 years, 12 had been residents of the Institution over 13 years, 6 for more than 9 years, 16 over 5 years. 74 patients were over 60 years of age, 36 over 50 years, 53 over 40 years, 21 over 35 years, 18 over 30 years.

Again it became necessary to have the Coroner visit the Institution to make inquiry into the death of three patients from suicide. After a full investigation into all the facts in each instance, no blame was attached to the Hospital or employees.

Again it is a privilege to record the general good health of our entire household. We have been spared the occurrence of any serious illness, and while our wards have been crowded far beyond their normal capacity, at times causing even discomfort and much irritability particularly among our disturbed class of patients, we have been most fortunate also in escaping serious accident. That we have been so favored, we feel is due largely to the number of men and women engaged every day in the various activities of the hospital.

Those whose conditions of health does not permit of engaging in any industry have spent much of their time out doors. In this way our crowded conditions have

been overcome during the day, and at night the wards have been quiet, following the days work and the time spent in the open air.

These measures have contributed in no small way to the improved conditions of health of the patients, in making them more contented and happier with their lot in life.

In so far as possible the established rule of engaging the patients in some suitable, as well as congenial employment has been continued. As is well known outdoor life offers the greatest inducement and above all others the one best suited for the great majority of our patients, and therefore, some occupation upon the farm, in the garden or caring for the greenhouses is eagerly sought and much enjoyed by many of our patients, resulting not only in their restoration to health but also the improved conditions of those who are compelled to remain with us.

During the winter months provision was made for the passing of the long winter afternoons and evenings in a number of concerts, entertainments, movie pictures, dances, as well as physical culture drills, special exercises and afternoon teas, given the women patients, by the older nurses. In this manner affording a relief from the tedium of hospital life, and it is regretted we cannot do more for our people in entertaining them.

The wards continue to be attractive, and homelike, and are provided with an abundance of reading matter, the daily papers, home papers, illustrated weeklies, magazines, etc. The greenhouse furnished an abundance of beautiful plants and flowers for decorating the dining-rooms, and halls.

The work done in the Art and Industrial classes has not only been a factor in the recovery of our younger men and women, but a pleasure and diversion in their restricted lives.

Those of our number who were sick and desired the consolations of their Church, were comforted by the visits of the clergymen of their faith and to these good men, who have so cheerfully visited the Hospital in answer to our calls at all times of the day or night, bring-

ing comfort to those in distress, we at this time express our deep feelings of appreciation.

Religious services were held in our chapel Sunday afternoons, and while these exercises are simple in character, they are eagerly looked forward to by the entire household. The chapel is usually filled with attentive listeners, and the music is furnished by a group chosen from our number. The Sunday school class was conducted Sunday mornings, except during the summer months, by our graduate nurses.

The yield of farm products during the two year period was quite up to the average although somewhat disappointing the last year owing to the unfavorable seasons, the very late and cold spring and the long continued wet weather extending far into the summer, making farming operations quite impossible as well as interfering with the crops and the maturing of vegetables and fruit.

The excessive rain fall also caused many slips over the lawns and farm lands as well as damage to roads so at times the operations of the farm were most discouraging.

For these reasons also the report of the housekeeper falls below the accustomed standard both in quantity and quality in the canning and preserving of vegetables and fruit.

The operative and mechanical departments have been conducted in a fairly satisfactory manner. The employees at times being quite inexperienced and even indifferent, requiring many changes and thereby causing an inefficient service. The main trouble is the inability of the Hospital to employ skilled labor.

Needed repairs and replacements to buildings have been made, and several outbuildings have been painted, also new farm and mechanical equipment was purchased where necessary.

In the purchasing department the exercise of good business judgment and economy has marked the administration of its affairs, again there has been a strict oversight in the purchase and selection of all supplies and furnishings as well as in the receiving of stores for the

various departments.

It is gratifying to note there has been an improvement in the character of the medical service particularly in the fewer changes that have occurred in the staff, thereby enabling the officers to gain a better understanding of patients in their approach in the solution of the many problems for their adjustment that mean so much and aid so materially in recovery.

The changes in the medical staff were.

Dr. Arlington J. Rawers, resigned October 15, 1927.

Dr. Marlowe Wolfe appointed July 9th, 1927, resigned October 15th, 1927.

Dr. James H. F. Adams resigned December 31st, 1927.

Dr. Kelse M. Hoffman, interne, appointed October 15th, 1927.

Dr. Jacob B. Kartub appointed November 1st, 1927, resigned December 1st, 1927.

Dr. Samuel L. Ravitch appointed December 15th, 1927.

Dr. John T. Lafferty appointed December 20th, 1927, resigned February 14th, 1928.

Dr. Jacob B. Kartub reappointed February 14th, 1927.

A noteworthy addition to the membership of the consulting staff was that of Dr. Thomas M. Barrett as Neurologist and Psychologist.

The Hospital has been visited as occasion required by the members of the consulting staff who gave freely of their time and whose experience and advice in sharing responsibility in oft times trying cases, was most helpful, and appreciated by the resident officers.

During the year the Hospital was again visited by students from the public schools, high schools and colleges in this vicinity. Nurses from general hospitals and social workers in their desire to gain a farther insight and knowledge of the care bestowed upon this army of the States dependents. The dissemination of the information derived from these visits is productive of much good in permitting of a broader and better understanding of mental illness, of its prevalence, its seriousness, as well as what is being done in modern hospitals, and the many noteworthy agencies for its relief. Clinics were held for the several visitors and cases presented, the

Nurses Dormitory

types of mental disease being explained by members of the staff.

The graduating exercises for the Training School for Nurses class of 1926 were held in the Chapel, Thursday evening, May 14, 1926. The address to the class was made by Rev. Hugh Thompson Kerr, D. D. of Pittsburgh, and the diplomas, class pins and honors were awarded by Mr. George E. Alter, member of the Board of Managers.

The graduation exercises of the Training School for Nurses, class of 1927 were held in the Chapel before an appreciative audience of friends and former graduates, Thursday evening, May 26th, 1927. The Rev. Owen Davies Odell, D. D. was speaker for the evening, and diplomas and class pins were awarded to seven young women members of the class by Mr. William E. Frick, Vice-president of the Board of Managers.

It is a pleasure to note the continued interest in the school. Constant effort has been made to enlarge its usefulness, and have it conform with the present day requirements in its teaching and the demands of mental hygiene, and social activities which enter into the training and equipment of a graduate nurse.

In reviewing all that has been accomplished in the two years now closed, for the measure of success that has rewarded our endeavor to promote the highest aims of the Hospital and afford our patients the best service known to medicine for their relief and secure to them a degree of comfort and happiness, I am indebted to my associate officers and all employees without whose cordial co-operation our efforts would have been in vain, and to the Members of the Board of Managers and more particularly to the Gentlemen composing the Executive Committee, I am also grateful for their continued willing and valued support.

Respectfully submitted,

HENRY A. HUTCHINSON,
Superintendent.

Miss Jane R. Marshall, Pa.	

1920

Miss Bessie Downing, Pa.	Miss Helen K. Beachy, Md.
Miss Mary J. Downing, Pa.	Miss Evelyn E. Beachy, Md.
*Miss Helen F. Graham, Pa.	Miss Amanda F. Wild, Ohio

1921

Miss Edna Katherine Durst, Md.	Miss Elizabeth M. Nicholson, Pa.
Miss Ethel Elizabeth Gibb, Pa.	Miss Gertrude L. Davis, W. Va.
Miss Ruth E. Pickering, Pa.	Miss Matreda B. Beckman, Pa.
Miss Bessie Belle Pickering, Pa.	Miss Mabel Amelia Bock, Ohio
Miss Mabel B. Davis, W. Va.	Miss Ella Luzurah Hite, W. Va.
Miss Elizabeth A. Smith, W. Va.	

1922

Miss Helen Louise Kopera, O.	Miss Katherine F. MacLeod
Miss Sara Mae Kyle, Pa.	Prince Edward Island
Miss Beatrice Ricketts, Pa.	Miss Margaret Hannah MacLeod,
Miss Anna Marie Strang, Pa.	Prince Edward Island
Miss Hulda Mae Thomas, Pa.	Miss Dora Lee Heckert, W. Va.
	Miss Metta Jane Heckert, W. Va.

1923

Miss Sara Virginia Coates, Irel'd	Miss Alma Blanche Tressler, Pa.
Miss Annie L. Heckert, W. Va.	Miss Bessie S. McCammon, Irel'd
Miss Lillie Olive Jones, W. Va.	

1924

Miss Katheryn G. Barideau, Pa.	Miss Mary L. McGookey, O.
Miss Louise May Coshen, Pa.	Miss Mary Luciel McGookey, O.
Miss Lumen Jean Dantheny, Pa.	Miss Lolita Louisa Swefert, O.
Miss Laura Cordelia Hand, Pa.	Miss Frances Marg. Smith, Pa.
Miss Valeta Cleo Hallahan, N.Y.	Miss Barbara C. White, Pa.
Miss Helen Allene Kerr, Pa.	Miss Lillian Mae Wright, Pa.
Miss Goldie Eva Lockard, Pa.	

1925

Miss Ruth Clarkson, Pa.	Miss Ruth Eva Patton, Pa.
Miss Minnie H. M. Lewis, Pa.	Miss Alice May Wilson, Pa.
Miss Susan Lobin, Pa.	

1926

Miss Esther McConnel, Pa.	Mrs. Mayme Whaley, W. Va.
Miss Elizabeth Metro, Pa.	Miss Artie Williams, W. Va.
Mrs. Angelo Stull, Pa.	

1927

Miss Helen E. Bartley, W. Va.	Miss Elza Helen Bluhm, Ohio
Miss Elsie May Hileman, Pa.	Miss Helen Anna Knapper, Pa.
Miss Ruth Amanda Long, Pa.	Miss Gladys T. McConnell, Pa.
Miss Catherine Elida Metro, Pa.	

1928

Miss Violet Pauline Metro, Pa.	Miss Edith Pauline Lefley, Pa.
Miss Alice Hileman Lingenfelter,	Miss Elsie Mae Thompson, Pa.
Pa.	

REPORT OF PATHOLOGICAL DEPARTMENT
FOR YEAR ENDING MAY 31, 1927 ..

Urine Examinations	500
Urine Examinations (special)	100
Sputum Examinations for Tuberculosis	175
Miscellaneous Smears	1,000
Vaginal Smears	50
Urethral Smears	5
Cultures, blood	60
Stool (Typhoid and Bacillary Dysentery)	75
Stool (T. B.) and Parasites	25
Throat	100
Stool (Blood)	10
Vaccines (Typhoid and Paratyphoid A. B.) doses	930
Vaccines Miscellaneous doses	100
Gastric Analysis	15
Miscellaneous Tissue Examinations	10
Salivary Urea Index	6
Blood Examinations	
Complement Fixation Tests for Syphilis	
Kolmer	366
Noguchi	366
Kahn Tests	366
Red Cell conts. 40. Heomoglobin Estimations	40
White cell conts. 80. Differentials	30
Grouping	20
Malarial Examinations	50
Icterus Index	5
Spinal Fluid Examinations	
Complement Fixation Tests for Syphilis	
Kolmer 55. Noguchi 55. Kahn 55.	
Noguchi Globulin Tests 55 Pandy Test 55	
Colloidal Gold 55 Mastic Gum 55.	
Sugar	10
Blood Chemistry .	
Non Protein Nitrogen 45. Urea 45. Acid 45. Creatinine	45
Sugar	60
Water Examinations. Bacteriological 90 samples, Milk sam... .	40
Guinea Pig Inoculations	28
Glucose Solution Prepared, liters	8
Rabbit Inoculations	12
Had 8.752 prepared	
Mastic Gum Solution prepared, liter	1
Colloidal Solution prepared, liters	5
Culture Media prepared, liters	45
Complement Fixation Test For Syphilis	
Blood, Male 240 Pos. 22. 10%. Positives	
Blood, Fem. 126 Pos. 11. 8%. Positives	
Total	366 Pos. 33.

REPORT OF THE PATHOLOGICAL DEPARTMENT
FOR YEAR ENDING MAY 31, 1928

Urine Examinations	450
Urine Examinations special	30
Sputum Examinations for Tuberculosis	75

Miscellaneous Smears	1,200
Vaginal Urethral Smears	48
Cultures Blood	6
Cultures Plates	600
Stool (Typhoid and Bacillary Dysentery)	10
Stool (T. B.) and Parasites	20
Throat Cultures	20
Stool (blood)	5
Vaccines (typhoid Paratyphoid A-B) 3 complete doses	1,400
Vaccines Miscellaneous	10
Gastric Analysis	5
Miscellaneous Tissue examination	20
Salivary urra index	5
Blood examinations (complement fixation test for Syphilis)	
Kolmer	341
Noguchi	341
Kahn Test	341
Red Cell conts.	30
Heamoglobin estimation	30
White cell conts.	30
Differential conts.	20
Blood grouping	10
Ucterus index	4
Spinal Fluid Examinations—	
Complement fixation tests for Syphilis	
Kolmer	36
Noguchi	36
Pandy	36

STATISTICAL TABLES

JUNE 1, 1926 to MAY 31, 1928

AND 1856

TABLE I

Movement of Patient Population for Two Years Beginning
June 1, 1926 and Ending May 31, 1928

	Male	Female	Total
Number of Patients on books of institution at beginning of Institution Year.....	530	485	1015
Admissions during two years:			
First admission	247	178	425
Readmissions	55	71	126
Transfers from other institutions for the insane	30	35	65
Total received during two years.....	332	284	616
Total under treatment during two years.....	862	769	1631
Discharged from books during two years:			
As recovered	19	24	43
As improved	127	102	229
As unimproved	19	16	35
Transferred to other institutions for the insane	1	3	4
Died during two years.....	136	100	236
Total Discharged, transferred and died dur- ing two years	302	245	547
Remaining on books of Institution May 31, 1928	560	524	1084
Average number during period.....	543	505	1048
Highest number during period	562	527	1089
Lowest number during period.....	524	483	1007

TABLE II

Total Admissions and Discharges since 1856

Admissions and Discharges	Male	Female	Total
Admitted	9,143	6,760	15,903
Discharged—Restored	2,020	1,581	3,601
Discharged—Improved	2,758	1,987	4,745
Discharged—Unimproved	881	543	1,424
Died	2,880	2,092	4,972

TABLE III
Number Admitted, Treated and Discharged Since 1856

YEAR	TOTAL				DISCHARGED								Total Discharged	
	Admitted		Treated		Restored		Improved		Unimp'd		Died

ARMSTRONG	INDIANA
BUTLER	JEFFERSON
BEAVER	LAWRENCE
CAMBRIA	SOMERSET
FAYETTE	WASHINGTON
GREENE	WESTMORELAND

RULES FOR THE ADMISSION OF PATIENTS

1. Each patient, before admission, shall be made perfectly clean and be free from any contagious or infectious disease.

2. Each male patient shall be provided with one extra suit shirts, socks, two suits underwear, hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

3. Each female patient shall have dresses, chemises, hose, nightgowns, two suits underwear, flannel skirt, muslin skirts, handkerchiefs, shoes, coat and hat or hood.

4. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved their self respect may be preserved.

In all cases the patients best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, matches, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of the patient's removal, or within three months afterwards, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

5. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned. All women patients must be accompanied to the Hospital by some female friend as required by law.

6. The price of board, including washing, mending, and attendance for all who are supported at public charge, \$6.00 per week. For private patients, or those supported by themselves or their friends the price varies from fifteen dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly in advance.

7. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

8. All bills remaining unpaid one month after date of presentation are placed in the hands of the Solicitor of the Hospital for collection.

9. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cake, or other edibles shall be given to the patients by their friends or visitors, without his express permission.

10. Visitors are admitted to inspect the Institution on Wednesdays and Saturdays between the hours of 10 A. M. and 12 A. M., and between 2 P. M. and 4 P. M.; but no visitor shall be admitted to the wards occupied by the patients, without express permission from the Superintendent; and especial care is taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays or on Sundays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

11. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railroad, at Dixmont, and can easily be reached by cars, there being many trains (east and west) each day (except Sunday), stopping at the Hospital Station. The street cars also run within a short distance of the Institution.

12. Applications for the admission of patients, and all communications in regard to the condition, health, bills, etc., of those who are in the Hospital, shall be made to the Superintendent.

13. The Superintendent can be seen at the Hospital, every week day, Sundays by appointment.

14. As Dixmont Station has an Express Office, all goods may be sent to the Hospital direct by express, freight, or parcel post, as may be preferred.

15. The friends of patients can communicate with the Institution by telegraph and telephone.

Report of the Board of Managers to the Public Welfare Commission

GENTLEMEN:

“In accordance with the provisions of the original charter of this Institution, I beg leave to present the following report of the transactions of the Hospital during the two years ending May 31st, 1930, and of its present condition, referring to further details to the statements of the Treasurer and Superintendent.”

The biennium period just closed has been one involving much thought and detail in the consideration of the many problems confronting the Institution, that it may be maintained upon a high standard of efficiency and that it meet satisfactorily all the relations imposed upon it toward the community.

We feel that much good has resulted from the careful oversight given in all its many interests and departments, and that the Hospital has sustained its reputation in caring for the patients in accordance with present day requirements of medical practice and in keeping with the many other conditions entering into the successful management of a hospital at this time.

It has been most gratifying to note the large number of patients restored to mental health and again able to take their accustomed places in their homes and social environment.

A still larger number of patients whose health was much improved, were permitted to return home. Many of these patients we learned later made good recoveries.

While the wards of the Hospital have been crowded far beyond their normal capacity, uniformly good health has prevailed and we realize that the patients, though compelled to endure some inconveniences, have been comfortable, well housed and well cared for.

We have been spared the presence of any serious illness and accident.

The uniform good health we attribute to the large number of patients who spend much time each day upon

the grounds and to the careful selection of congenial outdoor employment for others, who prefer to engage in some health-giving, as well as useful, occupation.

We gladly acknowledge the good will and cooperation existing among the officers and employees of the Hospital in their desire to advance the purposes and aims of the Institution and thereby contribute to the comfort, well being, and contentment of the patients.

As already stated in former reports, no patients were denied admission, but owing to our crowded conditions it was thought best to continue the refusal of patients desiring to come to us from adjoining states. The friends of each of these patients were referred to the proper hospital in their own community.

All needed repairs and improvements to the buildings and grounds have been made and at this time we are assured that the Institution is in good repair.

The last session of the legislature granted the Hospital an appropriation of \$70,000.00 for the building of a new reservoir and the laying of a water line from the power plant to the new reservoir. An appropriation of \$5,000.00 was also received for the extension and repairing of our electric lighting system. The total appropriation of \$75,000.00 was approved by the Governor May 3rd, 1929, and the work of installing the new reservoir and pipe line was begun November 12th, 1929. The new reservoir has a capacity of two million gallons. The work of building this reservoir and the laying of the pipe line was pushed forward as rapidly as possible and completed in June 1930. We feel that a wonderful advance has been made in the completion of this undertaking and the Hospital is now assured an abundant water supply at all times and the new reservoirs are sufficient to meet all demands made upon them as a means of fire protection.

The appropriation for the extension and renewal of our electric lighting system was also much needed and the completion of this work has also been of very great value to the Hospital.

Within the last year the Institution was visited by representatives of the Board of Fire Underwriters, who

were afforded every opportunity for the inspection of the Institution, the making of such suggestions for the elimination of fire hazards and the improving of our equipment, as deemed necessary to standardize and bring it up to present day requirements for safety and efficiency.

Many of these changes have been made, thereby affording a better protection of the Institution; the remaining recommendations are being cared for and will be completed as soon as possible.

It is our sad duty to report to your Board the death of Mr. William E. Frick, for many years a member of the Board of Directors and at the time of his death its Vice President and chairman of the Executive Committee. Mr. Frick's death occurred January 8th, 1929.

At a meeting of the Managers, June 12th, 1929, Mr. George E. Alter was chosen Vice President.

The Managers at this time renew their expressions of appreciation to the members of the Executive Committee who have been so loyal and painstaking in the observance of responsibilities placed upon them. Their meetings have been well attended and every consideration has been given to questions relative to policy and care of patients; and all matters in any way affecting the Institution have received careful attention.

In closing this report the Managers would also thank the officers and employees for their loyalty in the maintenance of the Institution upon a high standard of efficient and humanitarian interest.

Respectfully submitted,

DAVID A. REED,

President.

REPORT OF PHYSICIAN
AND SUPERINTENDENT

Report of the Physician and Superintendent to the President and Board of Managers.

GENTLEMEN:

I have the honor to present for your consideration this report of the Hospital for the two year period ending May 31st, 1930.

	Men	Women	Total
Number of Patients on books of Institution at beginning of Institution year	560	524	1084
Admissions during two years:			
First Admission	220	141	361
Readmissions	30	38	68
Transfers from other Institu- tions	26	25	51
Total received during two years...	276	204	480
Total under treatment during two years	836	728	1564
Discharged from books during two years:			
As recovered	30	32	62
As improved	69	56	125
As unimproved	8	6	14
Transferred to other Institu- tions	1	3	4
Died during two years	126	84	210
Total discharged, transferred and died during two years	234	181	415
Remaining on books of Institution May 31, 1930	595	539	1134
Average number during period ...	575	522	1097
Highest number during period	595	539	1134
Lowest number during period	556	505	1061

The statistical tables as here shown confront you with the crowded conditions of our wards and all departments. It is gratifying to note the general good health and comfort of our household, that we have been spared the occurrence of any serious illness or even accident. Uniformly good health has prevailed among the patients and employees.

There has been a very considerable increase in the number of patients who had made good recoveries. Among those discharged as improved a large percentage of them finally regained their mental and bodily health at home and the continued improvement of others.

To the after care these patients receive, so much depends upon their home conditions and surroundings which may influence their progress for good or retard their recovery, even perhaps hasten mental deterioration and finally compelling their return to the Hospital. These untoward conditions are hard to overcome and in the end the patient may become one for continued hospital care.

Fourteen patients left the Hospital as unimproved. A number of these being taken home upon the earnest solicitation of friends and against the advice of the officers. As was to be expected a large percentage of these patients owing to the progressive character of their disease were returned to the Hospital, their state of health being much worse than when leaving our care.

It was most fortunate that of this latter number no fatality or accident occurred at home. In each instance the immediate friends of the patients were warned of the possible dangers arising from the delusions the patient may have had.

As in former years every effort was put forth to grant a parole to patients where it was thought even a

temporary relief from their oft-times monotonous hospital life would benefit them.

The granting of a parole places a great responsibility upon the officers in order to avoid complications and disasters when away from hospital supervision. The same is equally true in the permitting of patients a parole of the grounds, thus allowing more freedom and a better opportunity to exert their own self will, as well as learn their fitness to again return to the outside world. In but few instances was this liberty abused.

The Hospital is not a place where the detention of patients should be irksome but provide every possible privilege and freedom conducive to their well being, their comfort and happiness. In pursuance of these purposes we feel the lives of many of our patients were made happier and aided very much in their improved mental and bodily health.

Of the patients admitted the several types of Dementia Praecox again predominated, of this form of mental disease there were 183 admissions, 64 patients were of the Manic Depressive type, 43 patients were Paretics, 3 patients were Paranoiacs, 23 Epileptics, 25 were cases of Involution Melancholia, 30 included the Toxic forms of mental disease and 60 patients represent the various degrees of Senility, 69 represented other Psychoses. The character of the admissions does not materially differ from those of more recent years.

Many of the admissions bore distinct evidences of faulty heredity as shown in the slight departures from the recognized standards of mental health to pronounced and easily recognizable abnormalities in the parents.

At the end of the present two year period there remained on the books of the Institution, May 31st, 1930,

eleven hundred thirty-four patients or fifty patients more than for the period ending May 31st, 1928. It will also be noticed the average number of patients during the period was ten hundred ninety-seven, the highest number in the house at any one time was eleven hundred thirty-four, while the lowest number was ten hundred sixty-one. The averages in each instance totaling a very considerable increase in our population over the last biennial report.

In view of the constant increase in the number of patients we were compelled to continue the policy already referred to, that no patient be admitted from an adjoining State and inasfar as possible our population be restricted to those counties comprising this hospital area.

The principal Psychoses shown in those who recovered are, 26 Dementia Praecox, 15 Manic Depressives, 5 Involution Melancholia and 11 Toxic Psychosis.

Of those leaving the Hospital as improved 52 represented the varied forms of Dementia Praecox, 25 were Manic Depressives, 7 were Epileptics, 6 were cases classified under the various forms of Toxic Psychoses, 11 were Paretics and 8 were cases grouped as Cerebral Syphilis.

The death rate for the period is considerably below the two preceding years; 210 patients died. The causes of death assigned do not differ materially from those reported in former years. The more frequent causes were: 46 patients died from some form of heart disease, 28 from Pnuemonia, 36 patients died from Tubercular disease, and 33 patients died from the Exhaustion of Paresis.

Nine had been residents of the Hospital for more

than 20 years, 14 for more than 13 years, 14 for over 9 years, 24 for over 5 years.

Sixty-nine patients at time of death were over sixty years of age, 41 patients were over 50 years of age, 54 patients were over 40 years of age, 16 were aged 35 years, 14 were over 30 years.

It became necessary to call the coroner who visited the Institution to make inquiry into the death of two male patients due to suicide. After a thorough investigation of all the facts a verdict was reached attaching no blame to the Hospital or employees.

As in former years constant demand was made upon the resources of the Hospital in providing for the comfort and happiness of our household, which also aided materially in the improved mental and bodily health of those of our number who must remain with us. Where possible patients were assigned congenial as well as useful occupations and inasmuch as the majority of them prefer outdoor life, large numbers were, therefore, engaged in some work upon the farm or in its various departments. Those preferring industrial work were usefully engaged in this department while others were interested in the mechanical departments. Very many young patients were employed in occupational therapy which also contributed its share in promoting as well as hastening their recovery.

Those unable for various reasons to engage in some form of occupation were permitted to spend many hours each day during the pleasant seasons of the year upon the grounds, in taking long walks and enjoying the beautiful scenery.

Within doors the same earnestness was manifested in making the home-life attractive. The wards were provided with daily papers and magazines, and from the greenhouse cut flowers and plants were provided for the dining rooms and hallways. Amusements consisting of concerts, picture shows, dances and the radio helped to pass away long winter evenings.

The observance of Sunday was conducted as usual. The church services were looked forward to, particularly by our older patients and we are indebted to the neighboring ministers in charge of these exercises. The usual Sunday School class was held Sunday mornings in charge of the older nurses.

Recognition should be made at this time of the ministrations of those good men who were called to minister to the sick and those in trouble and distress. The requests of those desiring consolation and comfort afforded by a visit from a representative of their chosen faith was in every instance granted. To these good men who visit the Hospital upon their errands of mercy at all times of the day and night we would at this time renew our obligations for their willingness to help those afflicted.

The farm and garden products for the period were quite up to the average standard and our people were afforded an abundance of fresh vegetables and fruit in their season. The staple crops were also up to the average, and the farm is well equipped in its mechanical operations, and throughout the period this department presented a pleasing appearance. The farm buildings were kept in good repair and the fencing, roadways, and orchards showed the care bestowed upon them.

The report of the housekeeper shows the large amount of work done in the putting up of fruit, vegetables, etc., for winter use.

In the mechanical departments all needed ordinary repairs have been made and new equipment added where necessary. At times it is extremely difficult to get reliable and skilled labor in this department which makes the work difficult and even unsatisfactory.

In purchasing of supplies and furnishings the strictest economy has again been maintained and the usual care exercised in the selection of only such supplies as we felt best suited to our requirements.

Students and nurses interested in abnormal psychology came from the various hospitals, high schools, and colleges in this vicinity and for all of these young people, clinics were held and their visits made as instructive as possible.

Changes in the medical staff:

Dr. Samuel L. Ravitch resigned June 19th, 1928.

Dr. Robert M. Allott resigned June 24th, 1929.

Dr. William J. Kennard appointed June 25th, 1929.

Dr. William A. King resigned August 6th, 1929.

Dr. Percy K. Heller appointed August 7th, 1929.

Dr. Percy K. Heller resigned March 3rd, 1930.

Dr. Wilson H. Lloyd appointed April 10th, 1930.

The members of the consulting staff were always willing and most generous to aid us and gave freely of their time in response to calls to visit the Hospital.

The consulting staff was also very greatly strengthened in the appointment of Dr. John M. Thorne as physician. Dr. Thorne brings to the hospital an experience of many years in the practice of his profession as well as the esteem in which he is held not only by his associates but the large number of friends who realize his work and value as a physician and consultant.

The graduation exercises of the training school for nurses, class of 1928 were held in the auditorium on Thursday evening, May 17th, and diplomas presented to four young women graduates by Mr. William E. Frick, Vice President of the Board of Managers. The address of the evening was made by the Honorable Fred T. Fruit, a member of the Board of Managers.

On June 14th, the graduation exercises of the school of nurses class of 1929 were held in the auditorium of the Hospital and diplomas presented to three young women graduates. The address of the evening and the awarding of diplomas was made by Honorable George E. Alter, member of the Board.

It is fitting to note forty years have passed since the inauguration of the Training School for Nurses and in the years that have followed, from a small beginning, this important feature of hospital life has grown until it is now recognized as one of the greatest gifts to mankind in affording relief to the suffering and in its care of the dependent and unfortunate.

Today graduates of the school occupy places of trust and responsibility the world over, others are doing their part in caring for the sick in general hospitals and many are engaged in private nursing.

In concluding this report I would again express my appreciation of the cooperation and loyalty accorded me

by all officers and employees in maintaining the Hospital in its work of humanity in caring for the unfortunate.

The success we have attained could only come through their earnestness and devotion and I would once more most cordially thank them, and to the members of the Board of Managers and more particularly the members of the Executive Committee am I indebted for their unfailing courtesy, patience and assistance so freely given me at all times in sharing the responsibility and promoting the good of the Hospital.

Respectfully submitted,

HENRY A. HUTCHINSON,

Superintendent.

Dixmont, Penna.

Miss Goldie Nell Smith, S. C.	Miss Blanche Cramer, Pa.
Miss Leila McGuire, W. Va.	Miss Lucille Hollingsworth, Va.
Miss Ellen Eliza Cahill, W. Va.	Miss Rebecca A. Sloan, Ireland
Miss Ella D. Holbert, W. Va.	Miss Isabelle Butler, Pa.

1915

Miss Nell Sorrells, Tenn.	Mrs. Jean Wiltshire, Pa.
Mrs. Docia M. Weaver, Tenn.	Miss Mary Walsh, Pa.
Miss Martha E. Bennett, Pa.	*Miss Louise Hahn, Pa.

1916

Miss Edna B. Chappell, Pa.	Miss Nellie C. Mortland, Pa.
Miss Ethel M. Collins, Ohio	Miss Agnes M. Nebel, Pa.
Miss Mary A. Cramer, Pa.	Miss Cora M. Sayre, W. Va.
Miss Estelle Halterman, W. Va.	Miss Carrie B. Summers, N. C.
Miss Christine M. Kennelly, Ireland	Miss Myrtle C. Van Leer, Pa.
Miss Emma Irene Leamer, Pa.	Miss Cora B. Williams, W. Va.
	Miss Iva B. Woods, W. Va.

1917

Miss Vinnie M. Chappel, Pa.	Miss Jessie McCammon, Ireland
Miss Florence H. Coburn, W. Va.	Miss Bertha B. McNickles, W. Va.
Miss Anna M. Gregg, Pa.	*Miss Elizabeth L. Orr, Scotland
Miss Virginia M. Krom, Pa.	*Miss Alma E. Reeves, Pa.
Miss Edna A. McBride, W. Va.	Miss Katherine M. Smith, S.C.
Miss Eva M. Murray, W. Va.	Miss Anna I. Veitch, Pa.

1918

Miss Florence L. Davis, W. Va.	Miss Virginia S. Bruce, W. Va.
Miss Virginia S. Ledwidge, Pa.	Miss Myra R. McBride, W. Va.
*Mrs. Elizabeth Springer, Scotland	

1919

Miss Dorothy E. Baker, Pa.	Miss Edna Olive Smith, W. Va.
Miss Mary A. Kostura, Pa.	Miss Roxie R. Williams, W. Va.
Miss Jane R. Marshall, Pa.	

1920

Miss Helen K. Beachy, Md.	Miss Mary J. Downing, Pa.
Miss Evelyn E. Beachy, Md.	*Miss Helen F. Graham, Pa.
Miss Bessie Downing, Pa.	Miss Amanda F. Wild, Ohio

1921

Miss Edna Katherine Durst, Md.	Miss Elizabeth A. Smith, W. Va.
Miss Ethel Elizabeth Gibb, Pa.	*Miss Elizabeth M. Nicholson, Pa.
Miss Ruth E. Pickering, Pa.	Miss Gertrude L. Davis, W. Va.
Miss Bessie Belle Pickering, Pa.	Miss Matreda B. Beckman, Pa.
Miss Mabel B. Davis, W. Va.	Miss Mabel Amelia Bock, Ohio
	Miss Ella Luzurah Hite, W. Va.

1922

Miss Helen Louise Kopera, O.	Miss Katherine F. MacLeod
Miss Sara Mae Kyle, Pa.	Prince Edward Island
Miss Beatrice Ricketts, Pa.	Miss Margaret Hannah MacLeod
Miss Anna Marie Strang, Pa.	Prince Edward Island
Miss Hulda Mae Thomas, Pa.	Miss Dora Lee Heckert, W. Va.
	Miss Metta Jane Heckert, W. Va.

1923

Miss Sara Virginia Coates, Ireland	Miss Alma Blanche Tressler, Pa.
Miss Annie L. Heckert, W. Va.	Miss Bessie S. McCammon, Ireland
Miss Lillie Olive Jones, W. Va.	

1924

Miss Katheryn G. Barideau, Pa.	Miss Mary L. McGookey, O.
Miss Louise May Coshen, Pa.	Miss Mary Luciel McGookey, O.
Miss Lumen Jean Dantheny, Pa.	Miss Lolita Louisa Swefert, O.
Miss Laura Cordelia Hand, Pa.	Miss Frances Marg. Smith, Pa.
Miss Valeta Cleo Hallahan, N.Y.	Miss Barbara C. White, Pa.
Miss Helen Allene Kerr, Pa.	Miss Lillian Mae Wright, Pa.
Miss Goldie Eva Lockard, Pa.	

1925

Miss Ruth Clarkson, Pa.	Miss Ruth Eva Patton, Pa.
Miss Minnie H. M. Lewis, Pa.	Miss Alice May Wilson, Pa.
Miss Susan Lobin, Pa.	

1926

Miss Esther McConnel, Pa.	Mrs. Mayme Whaley, W. Va.
Miss Elizabeth Metro, Pa.	Miss Artie Williams, W. Va.
Mrs. Angelo Stull, Pa.	

1927

Miss Helen E. Bartley, W. Va.	Miss Elza Helen Bluhm, O.
Miss Elsie May Hileman, Pa.	Miss Helen Anna Knapper, Pa.
Miss Ruth Amanda Long, Pa.	Miss Gladys T. McConnell, Pa.
Miss Catherine Elida Metro, Pa.	

1928

Miss Violet Pauline Metro, Pa.	Miss Edith Pauline Lefley, Pa.
Miss Alice Hileman Lingenfel- ter, Pa.	Miss Elsie Mae Thompson, Pa.

1929

Miss Anna Geraldine Kudelko, Pa.	Miss Anna Marie Pojedinec, Pa.
	Miss Helen Phyllis Tokay, Pa.

1930

Miss Mary Beatrice Burke, Pa.	Miss Lillian Derwin Munday, Pa.
Miss Martha Elizabeth Garland, Pa.	Miss Alice Lorelee Stancourt Cuba
Miss Kathleen May Horton, Pa.	Mrs. Pauline Grace Woodward, Pa.
Miss Ethel Oma Long, Pa.	

REPORT OF PATHOLOGICAL DEPARTMENT FOR YEAR
ENDING MAY 31st, 1929.

Urine Examinations	490
Urine Examinations (Special)	40
Sputum Examinations for T. B.	30
Miscellaneous—Smears	1,095
Vaginal Smears	30
Urethral Smears	8
Cultures—Blood	18
Plates Agar, etc.	1,200
Stool (Typhoid and B. Dysentery)	14
Stool (T. B. and Parasites)	12
Throat Cultures	40
Stool (Blood)	11
Vaccines (Typhoid Para A-B-Doses)	1,200
Vaccines Miscellaneous	4
Gastric Analysis	2
Salivary Urea Index	4

BLOOD EXAMINATIONS

Complement fixation tests for Syphilis.

Kolmer	341
Noguchi	341
Kahn Tests	341	
Red Cell Cont.	30
White Cell Cont.	40
Heamoglobin	30
Differential	30	
Grouping		6
Malarial Examinations		8

ENDING MAY 31st, 1929—Continued

SPINAL FLUID EXAMINATIONS

Complement fixation tests for Syphilis.

Kolmer	36	Noguchi	36
Kahn	36	Globulin-Noguchi	36
Pandy	36	Colloidal Gold	36
Mastic Gum	36		

BLOOD CHEMISTRY

Non protein Nitrogen.....	14	Uric Acid	16
Urea	16	Sugar	18

WATER EXAMINATIONS

Samples—Chemical	400
Bacteriological—Samples	500
Milk—samples	158
Guinea inoculations	12
Rabbits	8

SOLUTIONS PREPARED

Glucose 10 %	8 liters
Sodium Chloride	112 “

REPORT OF PATHOLOGICAL DEPARTMENT FOR YEAR
ENDING MAY 31st, 1929—Continued

Culture Medias total amount	65 liters
Colloidal Gold	4 “
Mastic Gum	1 “
O. Tolidine Solution for Chlorine	5 “
Soap Solution for Hardness of Water	5 “

All Amboception and Antigens and other reagents prepared in the Laboratory by the Technician.

Total number of Bloods examined, Complement fixation tests for Syphilis			341
Male	Positives	Percentage	
185	23	12 %	
Female	Positives	Percentage	
156	11	7 %	
Total Positives, Males and Females.....			34

REPORT OF PATHOLOGICAL DEPARTMENT FOR YEAR
ENDING MAY 31st, 1930

Urine Examinations	1,040
Sputum	49
Miscellaneous Smears	900
Vaginal Urethral Smears	36
Cultures Blood	14
Cultures Plates	1,030
Stool (Typhoid and Bacillary Dysentery)	5
Stool (T. B.) and Parasites	16
Throat Cultures	27
Stool (Blood)	8
Vaccines (Typhoid Paratyphoid A-B) 3 complete doses....	210
Vaccines, Miscellaneous	8
Gastric Analysis	5
Miscellaneous Tissue Examination	10
Salivary Urea Index	13

Blood examinations (Complement fixation test for Syphilis):—

Kolmer	330
Noguchi	330
Kahn Test	330
Red Cell Conts.	43
Heamoglobin Estimation	43
White Cell Conts.	48
Differential Conts.	43
Blood Grouping	4
Icterus Index	5

Spinal Fluid examinations—Complement fixation tests for Syphilis:—

Kolmer	36
Noguchi	36
Pandy	36
Sugar	5
Kahn Tests	36
Colloidal Gold	36
Mastic Gum	36

Blood Chemistry:—

Non Protein Nitrogen	13
Urea	9
Uric Acid	9
Creatinine	9
Sugar	20
Chlorides	8
Cholesterol	1

Water and Milk Examinations:—

Bacteriological	500
Chemical	369
Guinea pig inoculations	10
Rabbits	8

Solutions prepared:—

Glucose	10
Sodium Chloride	110 liters
Amount of Culture Media Prepared	120 liters
Colloidal Gold	4 “
Mastic Gum	2 “

Total number of Blood Examinations—Complement Fixation Test for Syphilis:—

Total	330
Blood, Male 190—Positive 18	% 9
Blood, Female 140—Positive 10	% 7
Total 330—Positive 28	

Report of the Dental Department for the Year Ending May 31st, 1929

Visits	547
Inspections	76
Extractions	1,315
Prophylaxis	35
Post-Operative Treatments	20
Antrums opened	
Antrums treated	
Ears Treated	
Abscessed Teeth	1,039
Buccal resections	
Surgical operations	4
Gingivitis treatments	39
Impacted teeth	3
Chloroform	1

STATISTICAL TABLES
May 31, 1928 to May 31, 1930
and 1856

TABLE I.

Movement of Patient Population for Two Years Beginning
June 1st, 1928, and Ending May 31st, 1930

	Male	Female	Total
Number of Patients on Books of Institution			
at beginning of Institution year.....	560	524	1084
Admission during two years:			
First Admission	220	141	361
Readmissions	30	38	68
Transfers from other institutions for the insane	26	25	51
Total received during two years.....	276	204	480
Total under treatment during two years..	836	728	1564
Discharged from books during two years:			
As recovered	30	32	62
As improved	69	56	125
As unimproved	8	6	14
Transferred to other institutions for the insane	1	3	4
Died during two years.....	126	84	210
Total discharged, transferred and died dur- ing two years	234	181	415
Remaining on books of Institution May 31, 1930	595	539	1134
Average number during period	575	522	1097
Highest number during period	595	539	1134
Lowest number during period	556	505	1061

TABLE II.

Total Admissions and Discharges since 1856

Admissions and Discharges	Male	Female	Total
Admitted	9,419	6,964	16,383
Discharged—Restored	2,050	1,613	3,663
Discharged—Improved	2,827	2,043	4,870
Discharged—Unimproved	889	549	1,438
Died	3,006	2,176	5,182

TABLE III.
Number Admitted, Treated and Discharged Since 1856

YEAR	TOTAL						DISCHARGED								Total Discharged	
	Admitted		Treated		Restored		Improved		Unimp'd		Died		M.	F.		
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.

TABLE VII

Psychoses of First Admissions for Two Years
Ending May 31, 1930

Psychoses	Male	Female	Total
Traumatic	1	0	1
Senile	36	22	58
General Paralysis	22	10	32
Psychoses with Cerebral Syphilis . . .	10	4	14
Psychoses with Huntington's Chorea..	2	0	2
Psychoses Due to Drugs and other			
Exogenous Toxins	14	6	20
Psychoses with other Somatic Diseases	6	3	9
Manic Depressive	26	20	46
Involution Melancholia	7	10	17
Dementia Praecox (total)	75	51	126
Paranoia and Paranoid Conditions....	0	1	1
Epileptic	12	7	19
Psychoses with Mental Deficiency....	9	7	16
Total	220	141	361

TABLE VIII

Classification of Total Number of Admissions For Two Years
Ending May 31, 1930

Psychoses	Male	Female	Total
Traumatic	1	0	1
Senile	37	23	60
Psychoses with Cerebral Arterio- Sclerosis	1	0	1
General Paralysis	30	13	43
Psychoses with Cerebral Syphilis	10	6	16
Psychoses with Huntington's Chorea .	2	0	2
Psychoses Due to Drugs and Other			
Exogenous Toxins	22	8	30
Psychosis with Somatic Diseases	7	4	11
Manic Depressive—Depressed Phase . .	20	17	37
Manic Depressive—Manic Phase	10	9	19
Manic Depressive—Mixed Phase	2	6	8
Involution Melancholia	10	15	25
Dementia Praecox—Catatonic	13	20	33
Dementia Praecox—Paranoid	37	39	76
Dementia Praecox—Hebepherenic . . .	19	8	27
Dementia Praecox—Simple	28	19	47
Paranoia	1	2	3
Epileptic	16	7	23
Psychoses with Mental Deficiency . . .	10	8	18
Total	276	204	480

TABLE IX
Age of First Admissions Classified with Reference to Principal Psychoses
For Two Years Ending May 31, 1930

Psychoses	Total Years			15-24 Years			25-34 Years			35-44 Years			45-54 Years			55-64 Years			65-69 Years			70 yrs. and over			Unascertained

Gas produced by wells, approximately.....	4,000,000	Cu. Ft.
Tons of ice manufactured	730	
Refrigeration in coolers, approximately 80 tons per month or 1920 tons for the two year period.		

LIST OF COUNTIES

Included in the Western Judicial District of Pennsylvania

ARMSTRONG	INDIANA
BUTLER	JEFFERSON
BEAVER	LAWRENCE
CAMBRIA	SOMERSET
FAYETTE	WASHINGTON
GREENE	WESTMORELAND

RULES FOR THE ADMISSION OF PATIENTS

1. Each patient, before admission, shall be made perfectly clean and be free from any contagious or infectious disease.

2. Each male patient shall be provided with one extra suit, shirts, socks, two suits underwear, hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.

3. Each female patient shall have dresses, chemises, hose, nightgowns, two suits underwear, flannel skirt, muslin skirts, handkerchiefs, shoes, coat and hat or hood.

4. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved their self respect may be preserved.

In all cases the patients best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, matches, knives, etc., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of the patient's removal, or within three months afterwards, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

5. A written history of the case should be sent with the patient and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned. All women patients must be accompanied to the Hospital by some female friend as required by law.

6. The price of board, including washing, mending, and attendance for all who are supported at public charge, \$6.00 per week. For private patients, or those supported by themselves or their friends the price varies from fifteen dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly in advance.

7. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

8. All bills remaining unpaid one month after date of presentation are placed in the hands of the Solicitor of the Hospital for collection.

9. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cake, or other edibles shall be given to the patients by their friends or visitors without his express permission.

10. Visitors are admitted to inspect the Institution on Wednesdays and Saturdays between the hours of 10 A. M. and 12 A. M., and between 2 P. M. and 4 P. M.; but no visitor shall be admitted to the wards occupied by the patients, without express permission from the Superintendent; and especial care is taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays or on Sundays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

11. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railroad, at Dixmont, and can be reached by cars, there being many trains (east and west) each day (except Sunday), stopping at the Hospital Station. The street cars also run within a short distance of the Institution.

12. Application for the admission of patients, and all communications in regard to the condition, health, bills, etc., of those who are in the Hospital, shall be made to the Superintendent.

13. The Superintendent can be seen at the Hospital, every week day, Sundays by appointment.

14. As Dixmont Station has an Express Office, all goods may be sent to the Hospital direct by express, freight, or parcel post, as may be preferred.

15. The friends of patients can communicate with the Institution by telegraph and telephone.
